PNH JÁ CONTA COM MAIS DE 47 ANOS DE EXPERIÊNCIA NA ÁREA DA METALURGIA E METALOMECÂNICA, TENDO ATUALMENTE UMA POSIÇÃO CONSOLIDADA NO MERCADO DA PRODUÇÃO E COMERCIALIZAÇÃO DE MOBILIÁRIO E EQUIPAMENTOS HOTELEIROS E HOSPITALARES, EM AÇO INOX.

Alicerçada numa política sustentada de crescimento e assegurando o cumprimento das expectativas dos nossos clientes, a marca PNH é hoje reconhecida como uma referência na sua área de atividade.

Os constantes investimentos em inovação e tecnologia, ajudam-nos a estar presentes em mercados de grande exigência e permitem-nos ter uma carteira de clientes fidelizados, bem como o seu reconhecimento.

Consideramos a **nossa Política da Qualidade** como **um dos pilares fundamentais do sucesso da empresa**, guiando-nos no sentido da obtenção da melhor qualidade, da melhoria contínua e do melhor desempenho possível.

Tendo em vista a melhoria contínua, avaliamos regularmente o nosso desempenho de forma a atingirmos os objetivos e metas por nós estabelecidos, adequando a nossa Política de Qualidade à constante evolução das atividades, produtos, serviços e relacionamento com as partes interessadas.

O nosso futuro traduz-se na procura incansável da satisfação máxima de todos aqueles que conosco se relacionam.

EN

PNH HAS MORE THAN 47 YEARS OF EXPERIENCE IN THE METALLURGY AND METALWORKING INDUSTRIES, HAVING NOWADAYS A CONSOLIDATED POSITION IN THE MARKET OF PROFESSIONAL STAINLESS STEEL FURNITURE & EQUIPMENT PRODUCTION, FOR HOTELS AND HOSPITALS.

Based on a sustained policy of growth and ensuring the fulfilment of our customers' expectations, the PNH brand is today recognized as a reference in its area of activity.

The constant investment in innovation and technology, help us to be present in highly demanding markets and allow us to have a portfolio of loyal customers, as well as their recognition.

We consider our Quality Policy as one of the fundamental pillars in the company's success, guiding us towards obtaining the best quality, continuous improvement and the best possible performance.

Having this in mind, we regularly evaluate our performance in order to achieve the objectives and goals established by us, adapting our Quality Policy to the constant evolution of activities, products, services and relationships with stakeholders.

Our future translates into the relentless pursuit of maximum satisfaction for all those who relate to us.

FR

PNH A PLUS DE 47 ANS D'EXPÉRIENCE DANS LE DOMAINE DE LA MÉTALLURGIE ET DE LA MÉTALLOMÉCANIQUE, AYANT AUJOURD'HUI UNE POSITION CONSOLIDÉE SUR LE MARCHÉ DE LA PRODUCTION ET DE LA VENTE DE MOBILIER ET D'ÉQUIPEMENTS HÔTELIERS ET HOSPITALIERS, EN ACIER INOXYDABLE.

Basée sur une politique de croissance soutenue et assurant la satisfaction des attentes de nos clients, la marque PNH est aujourd'hui reconnue comme une référence dans son domaine d'activité.

Les investissements constants dans l'innovation et la technologie, nous aident à être présents sur des marchés très exigeants et nous permettent d'avoir un portefeuille de clients fidèles, ainsi que leur reconnaissance.

Nous considérons notre politique de qualité comme l'un des piliers fondamentaux du succès de l'entreprise, qui nous guide vers l'obtention de la meilleure qualité, l'amélioration continue et les meilleures performances possibles.

Dans une optique d'amélioration continue, nous évaluons régulièrement nos performances afin d'atteindre les objectifs et les buts que nous nous sommes fixés, en adaptant notre politique de qualité à l'évolution constante des activités, des produits, des services et des relations avec les parties prenantes.

Notre avenir se traduit par la recherche incessante d'une satisfaction maximale pour tous ceux qui nous entourent.

COMO FUNCIONA?

O funcionamento dos separadores de gordura não requer consumo de energia, baseando-se na separação pela gravidade dos materiais com uma densidade diferente da água.

Os produtos mais pesados fixam-se no compartimento de pré-decantação (cesto) e são aí retidos. Este compartimento também retém os óleos que são facilmente flutuantes. Apenas água e substâncias mais leves que a água, geralmente os óleos a separar, passam para a zona de separação. Os óleos acumulam-se na superfície, ao mesmo tempo que a água limpa passa para um nível que não permite a mistura das substâncias.

EN

HOW DOES IT WORK?

The operation of the fat separators does not require energy consumption, based on the separation by gravity of materials with a different density from water.

The heavier products settle in the pre-decantation compartment (basket) and are retained there. This compartment also retains the oils that are easily floated. Only water and substances lighter than water, usually the oils to be separated, pass through to the separation zone. The oils accumulate on the surface, at the same time as the clean water passes to a level that does not allow the substances to mix.

FR

COMMENT CELA FONCTIONNE?

Le fonctionnement des séparateurs de graisse ne nécessite pas de consommation d'énergie. Il est basé sur la séparation par gravité de matériaux ayant une densité différente de celle de l'eau. Les produits les plus lourds se déposent dans le compartiment de prédécantation (panier) et y sont retenus. Ce compartiment retient également les huiles qui flottent facilement. Seules l'eau et les substances plus légères que l'eau, généralement les huiles à séparer, passent dans la zone de séparation. Les huiles s'accumulent à la surface, en même temps que l'eau propre passe à un niveau qui ne permet pas aux substances de se mélanger.

ES

¿CÓMO FUNCIONA?

El funcionamiento de los separadores de aceite no requiere consumo energético, basándose en la separación por gravedad de las materias con densidad diferente al agua. Los productos más pesados se sedimentan en el compartimento de pre-decantación (cesto) quedándose ahí retenidos. Este compartimento retiene además los aceites que se encuentran fácilmente flotables. A la zona de separación pasan apenas el agua y las sustancias más ligeras que el agua, normalmente los aceites que se quieren separar. Los aceites se van acumulando en la superficie, al mismo tiempo que el agua limpia pasa a un nivel que no permite la mezcla de las sustancias.
